

SENEBOGEN

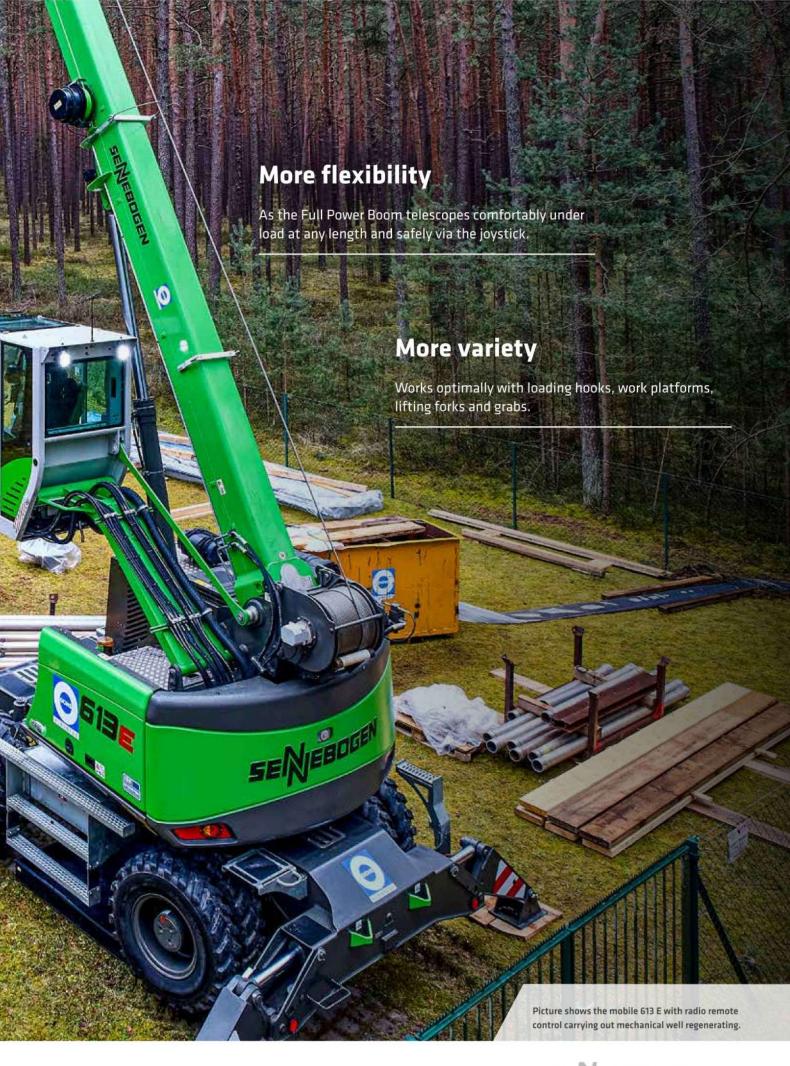

The compact one The 16 t telescopic crawler crane is a compact construction site crane that can be used in a wide range of ways. Its powerful Full Power Boom, manageable dimensions and excellent off-road mobility mean that it will quickly become the most important tool on your construction site. This all-rounder impresses with sophisticated technology and masterful interplay. The ultra modern engine and exhaust system, the precise controls, and the powerful work hydraulics ensure maximum performance and a wide range of possible applications. Maintenance & Service This is made easy with standard components and easyto-access maintenance and service points. Ultimate ease of use With a sound-proofed, flexibly mounted, elevating comfort MultiCab. Fast on site and ready for use Easy to transport, including ballast. To the construction site, unload - off you go.

LONG SERVICE LIFE, HIGH VALUE RETENTION

Reliable and powerful thanks to its robust construction and high-quality components

SOPHISTICATED, STATE-OF-THE-ART TECHNOLOGY

In the 5th generation - decades of experience in designing and constructing telescopic cranes

SIMPLE TO MAINTAIN AND SERVICE

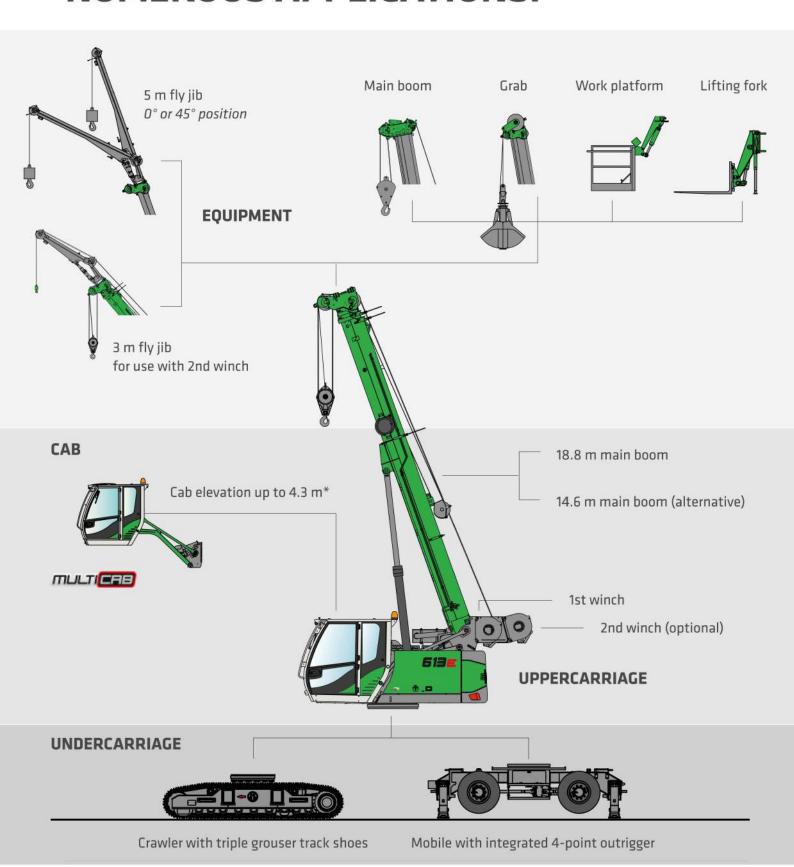

Technology that can be mastered and no overengineering, easy access to all components

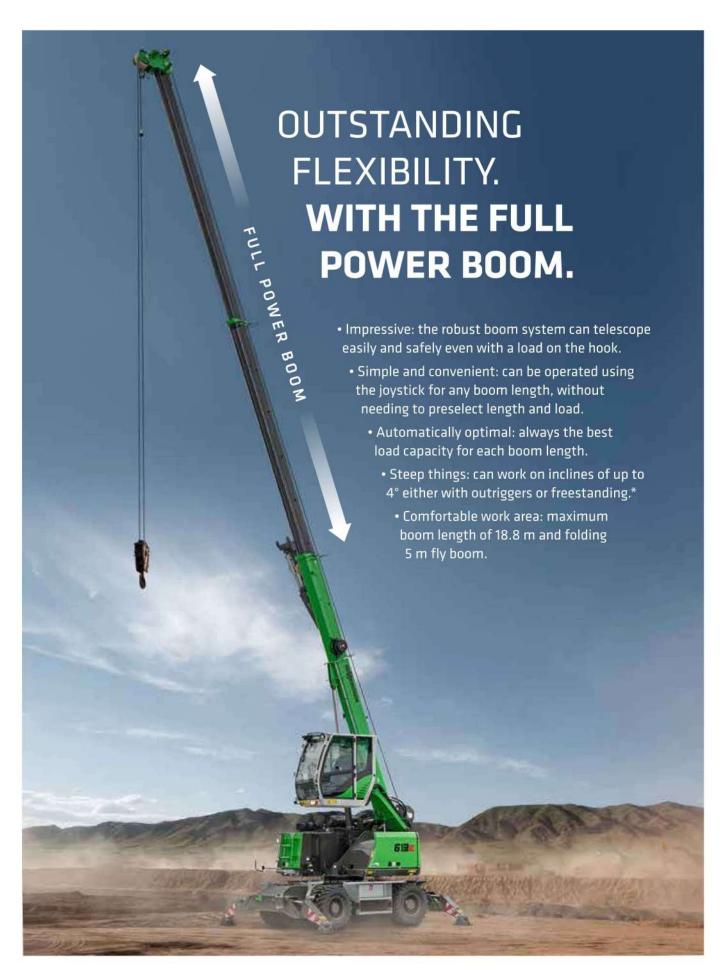

ENVIRONMENTALLY-FRIENDLY DRIVE TECHNOLOGY

- State-of-the-art engine, drive and emission systems in line with the latest technology standards (stage V)
- Large-scale pipes and valves for maximum efficiency

A MODULAR DESIGN. NUMEROUS APPLICATIONS.

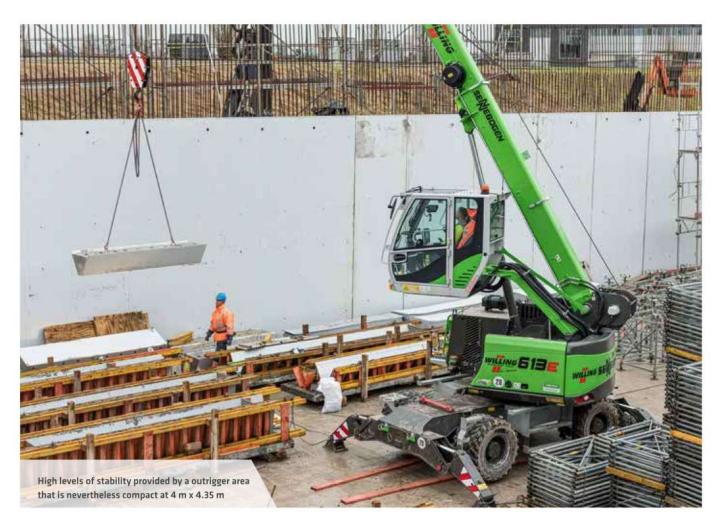

COMPACT AND STRONG. WITH MAXIMUM FLEXIBILITY.

- Pick & Carry: lifting and moving loads
- Excellent maneuverability even on narrow construction sites thanks to its small turning circle with crawler tracks
- Ideal overview whilst operating thanks to the elevated cab position
- Numerous equipment options: work platform, lifting fork, hydraulic grab, and operation by radio remote control

BETTER VIEW. BETTER SAFETY. BETTER ELEVATION.

The elevating cab and an eye level of around 4.30 m (!) means improved safety levels when lifting, moving and setting down loads.

A good view of all obstacles

The ideal cab and view height whilst operating means having a perfect view of all the obstacles on the construction site.

Improved ergonomics

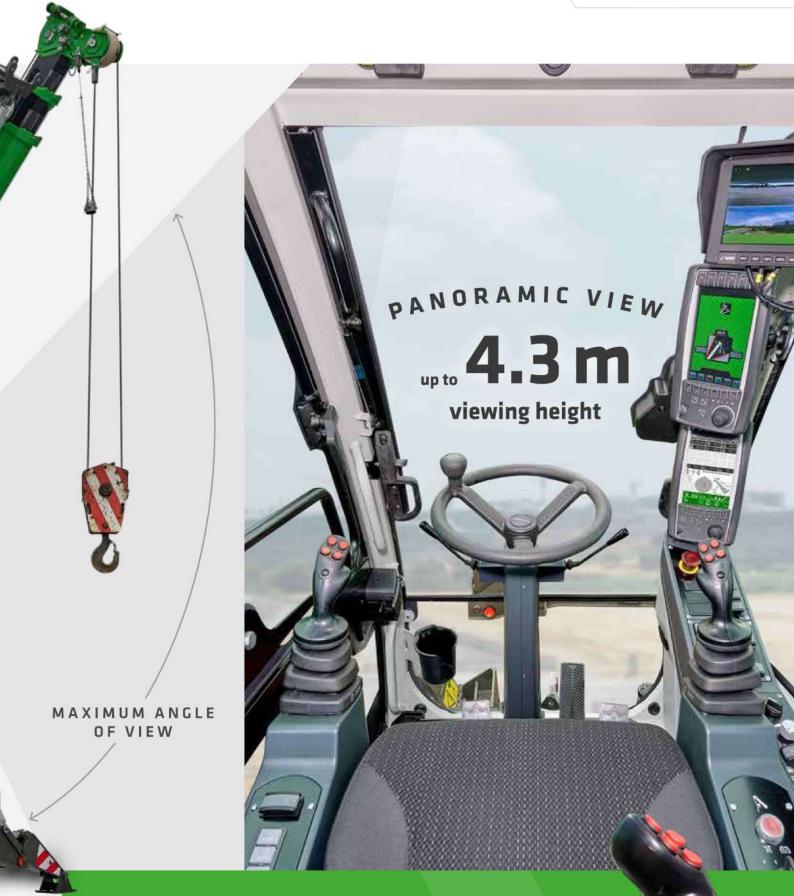

Sitting in a natural position and having the optimal view means you can concentrate and yet stay relaxed.

THE PREMIUM CAB.

- Flexibly mounted, comfortable operator's cab with super sound-proofing
- Panoramic view with all-round glazing made from safety glass, with curved, hinged windshield, large roof window and rear window
- Optimal interior climate thanks to continuously adjustable cab heating and air conditioning
- Air-suspension comfort seat with seat heater, vibration damper, adjustable to any weight
- Ergonomic set up, resonant controls
- Radio with Bluetooth®

TAKE FULL CONTROL WITH OUR JOYSTICKS

- Joysticks on resonant, seat-mounted consoles
 - · Comfortable grip thanks to ergonomic design
 - Shortcuts for direct and sensitive control of all functions
 - Easy to use thanks to the optimized design of buttons and switches

EASY TO TRANSPORT. READY FOR USE QUICKLY.

It is not just with procurement and operating costs that companies can make cost-effective decisions and savings. Astute contractors know that simple and economical transportation between construction sites is an important factor too.

20t*

Economical

With a transport width of just 2.55 m, the 613 E fits easily on any standard low-loader. This means a transport license is not required and significantly reduces the costs involved.

Easy

Thanks to its low weight of less than 20 t, the machine can be transported in its fully assembled mode. Even entering of downtown sites is hassle free.

Quick

Once it reaches the construction site, the machine is ready to use as soon as it has been unloaded.

MAINTENANCE AND SERVICE. MAKE IT EASY ON YOURSELF.

The SENCON control system supports you with diagnostics and makes troubleshooting easier. So your machine is back in action faster.

All maintenance and service points are arranged clearly and easily accessible. The clear labeling of components makes finding your way around easy.

KEEP IT SIMPLE. WITH TECHNOLOGY THAT CAN BE MASTERED.

Reliable and practical technology makes life easier. Where electronics add no value, we rely on hydraulics and electrical systems.

We make you happy, not reliant.
With cost-effective components and
fewer process steps, you can take
care of your own machine.

A central electrical distributor simplifies the clearly arranged standard components for the controls and troubleshooting.

MACHINE TYPE

MODEL (TYPE) 613 Mobile

ENGINE	
TYPE	Stage V: F3.8 FR95683 Rated power: 100 kW / 2200 rpm Operating point standard: 100 kW / 2200 rpm Operating point ECO: 99 kW / 2000 rpm Stage Illa: Available on request
	both: Direct injection, turbocharged, charge air cooling, reduced emissions
COOLING	water-cooled
DIESEL FILTER	with water separator and heater
AIR FILTER	Dry filter with integrated pre-separator, auto- matic dust discharge, main element and safety element, contamination indicator
FUEL TANK	200
DEF TANK	30
ELECTRICAL SYSTEM	24 V
BATTERIES	2 x 155 Ah
OPTIONS	Low temperature package with engine preheating and reinforced batteries
	Electric fuel numn

UPPERCAR	RIAGE			
DESIGN	Torsion-resistant box design, precision crafted, steel bushings for boom mountings. Service-friendly design, engine installed in the longitudinal direction			
ELECTRICAL SYSTEM	central electrical distributor, battery disconnect switch			
LIGHTING	LED headlights for optimal lighting of the work area			
COOLING SYSTEM	3-circuit cooling system with high cooling output, electrically regulated fan drive for cooling water, charged air and oil			
SAFETY	Camera monitoring of the area to the rear and the right side			
OPTIONS	Additional LED headlights			
	2 flashing lights at the rear			
	Additional cameras			
	Sea climate resistant coating as corrosion protection			
	Customized paint finish			
	Low temperature package			
	Automatic central lubrication for boom attachment point, luffing cylinder and live ring track			
	Pinion tooth lubrication			

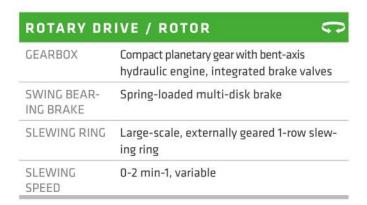

HYDRAULIC SYSTEM / HYDRAULICS

1

Pump unit attached directly to diesel engine. Load-sensing/LUDV hydraulic system, electro-hydraulic work functions, load limit control, axial piston variable displacement pump. Multiple work functions can be controlled precisely simultaneously and independently from each other thanks to the independent, proportional allocation of the pump flows.

independent, p	roportional allocation of the pump flows.					
FLOW RATE	up to 200 I / min					
OPERATING PRESSURE	up to 330 bar					
FILTRATION	High-performance filtration with long change interval					
HYDRAULIC TANK	180 l					
CONTROL SYSTEM	Proportional, precision hydraulic control of the movements, 2 servo joysticks for work functions, additional functions via switches and foot pedals - arranged clearly and ergonomically					
SAFETY	Hydraulic circuits with safety valves					
	Pipe-fracture safety valves for luffing cylinder and telescopic cylinder					
OPTIONS	Bio-oil filling					
	SENNEBOGEN HydroClean micro-filter system (3 µm) with water separator					
	Hydraulic tank preheating					

CAB	MUSI <mark>CAB</mark>					
CAB TYPE	Multicab, 1.75 m elevation					
CAB EQUIP- MENT	Hydraulically elevating cab as standard across the series. Comfortable operator's cab, flexibly mounted with super sound-proofing. All-weather version, all-round glazing made from safety glass and a large skylight, opening windshield. Flexibly mounted comfort seat, weight adjustable and with vibration damper. Clear dashboard with swivel-mounted steering column. Continuously adjustable cab heating with air circulation control and particle filter, automatic air conditioning					
OPTIONS	Auxiliary heating system with timer					
	FOPS protective front grating					
	Protective roof grating					
	FOPS protective roof grating					
	Glazing in bulletproof glass					
	Radio with USB and SD connections, MP3 and Bluetooth® functions					

EQUIPMENT	· /\
воом	3-part with pulley head, hydraulic telescopic extension from 14.6 to 18.8 m, adjustment speed -12° to 70° in approx. 35 seconds
SAFETY BRAKE	Spring-loaded multi-disk brake
CRANE SAFETY	Latest generation of load moment moni- toring with event recorder, clear operations panel showing all important data via the SENCON display, lifting limit switch, cable exit protection, pressure relief valves and pipe fracture protection
	SENtrack telemetry system
CYLINDERS	Hydraulic cylinders with high-quality sealing and guide elements
OPTIONS	Fly boom 5 m folding jib, load capacity 4 t, tiltable by 45°, easy to set up without additional equipment, can be bolted to basic boom when not in use
	3 m folding jib in combination with 2nd hoist winch, load capacity 4 t, tiltable by 20°/ 45°, easy to set up without additional equipment, can be bolted to basic boom when not in use
	Lifting fork
	Aerial work platform
	Special paint finish
	Emergency unit
	Radio remote control
	Programmable working limit
	Grab equipment with clamshell grab, 600 I
	Additional load charts accepted for 2°/4° incline position

UNDERCA	
DESIGN	Mobile undercarriage, torsion resistant and precision crafted, with integrated 4-point outrigger
DRIVE	All-wheel drive and steering, travel drive with 2 stage powershift transmission, automatic pendulum axles with 4° pendulum angle, manually lockable, strong traction and driving dynamic
PARKING BRAKE	Spring-loaded multi-disk brake
TIRES	8x 10.000-20 tires
SPEED	0 - 8 km/h on site 0 - 20 km/h with StVZO [Road Traffic Licensing Regulation] approval
OPTIONS	Wider tires available on request with increased vehicle width of 2.75 m
	Shunting coupler

WINCH	
-------	--

The winches are driven via high-pressure-regulated adjustable hydraulic engines, so there is always optimal pulling force speed control. Hydraulic lowering brake valves for sensitive, wear-free braking. Strong, oil bath, planetary gear, low-maintenance.

Holding brakes are spring-loaded, maintenance-free, low-wear multi-disk brakes operating in oil bath, oil-cooled

35 kN tensile force (3rd position), cable speed 95 m/min., cable diameter 14 mm, max. cable length 80 m

OPTIONS	2nd crane winch: 35 kN tensile force (3rd
	position), cable speed 95 m/min., cable
	diameter 14 mm, max. cable length 160 m

OPERATING	WEIGHT
MASS	approx. 19,700 t with 18.8 m telescopic boom, 5 m fly boom, 10.5 t hook, 80 m hoist cable, 4.1 t ballast, 3.5 t winches
NOTE	Operating weight varies by model and equipment.
	Subject to technical changes!

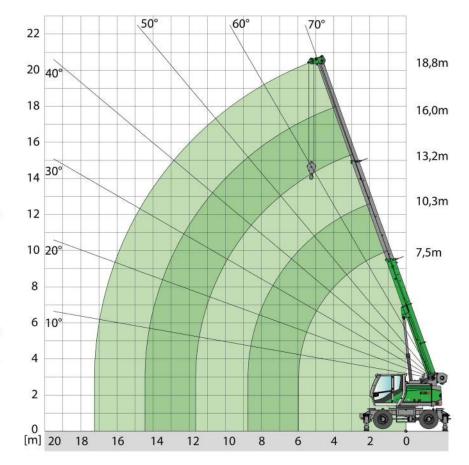

MAIN BOOM HA 18.8 m

Notes:

- The specified load ratings given apply when the machine is on a firm and level surface.
- The load ratings are given in tons and apply for a 360° swing angle. The load ratings apply to the 613 M with deployed outriggers, the load ratings in brackets () apply when it is freestanding on tires.
- The load ratings take the DIN 15019.2 and ISO 4305 standards into account.
- The weight of the load handling equipment (hooks, suspension gear) should be deducted from the load capacities.
- Load capacities must be limited or reduced in adverse conditions such as soft or uneven ground, slopes, wind, side loads, swinging loads, jolts or sudden stopping of loads, personnel and operators not experienced in handling loads.
- Permissible cable pull per strand in crane mode for a cable diameter of 14 mm is 3,500 kg.
- Load capacities marked with a * only apply with specific equipment.
- The load ratings given are for reference only. Please refer to the tables in the operating instructions for the relevant applicable load ratings.
