The Cat 910M, 914M and 918M Wheel Loaders set the standard for productivity, fuel efficiency and operator comfort. The improved optimized Z-bar loader linkage delivers the quick loading performance of a traditional Z-bar with the parallelism and load handling capability of a toolcarrier. A high torque, lower speed Cat C4.4 ACERT engine works in concert with an intelligent hystat power train to deliver fuel efficiency as standard. Meets Tier 4 Final and Stage IV emission standards with a diesel oxidation catalyst designed to manage itself so you can concentrate on your work. Experience the new industry benchmark.

Efficiently Powerful

Experience hybrid like fuel efficiency with more power when you need it.

Intelligent Power Management

The Caterpillar exclusive Intelligent Power Management system has been further enhanced to monitor operator input and power availability to keep the machine working at peak efficiency and provide the operator with greater customization to suit their application.

Maximize Fuel Efficiency

Eco Mode allows you to choose between maximum fuel efficiency and boosted hydraulic speed.

Eco Mode

- Enabled at the push of a button (Eco).
- Saves up to 5% fuel consumption compared to Standard Mode. Biggest gains seen during load and carry, snow removal and roading applications.
- Intelligent Hystat maintains maximum ground speed capability.

Standard Mode

- Boosts engine speed by over 20%.
- Increases hydraulic cycle times and productivity.
- Recommended when working on grades or in applications requiring hydro mechanical work tools.

Four Cylinders of Efficient Power

The Cat C4.4 ACERT engine provides cleaner, quieter operation while delivering superior performance and durability through a high torque, lower speed design. The engine meets Tier 4 Final and Stage IV emission requirements with a clean emissions module that is designed to manage itself so you can concentrate on your work.

- **No downtime required** with a self-managing aftertreatment system that keeps you on the job.
- **Extended fluid fill intervals** with minimal use of Diesel Exhaust Fluid (DEF) also known as Adblue with up to six fuel tank fills per DEF fill.
- **Configurable auto idle shut down** based on time and ambient temperature to further reduce fuel burn and keep operating costs low.

Power to the Ground

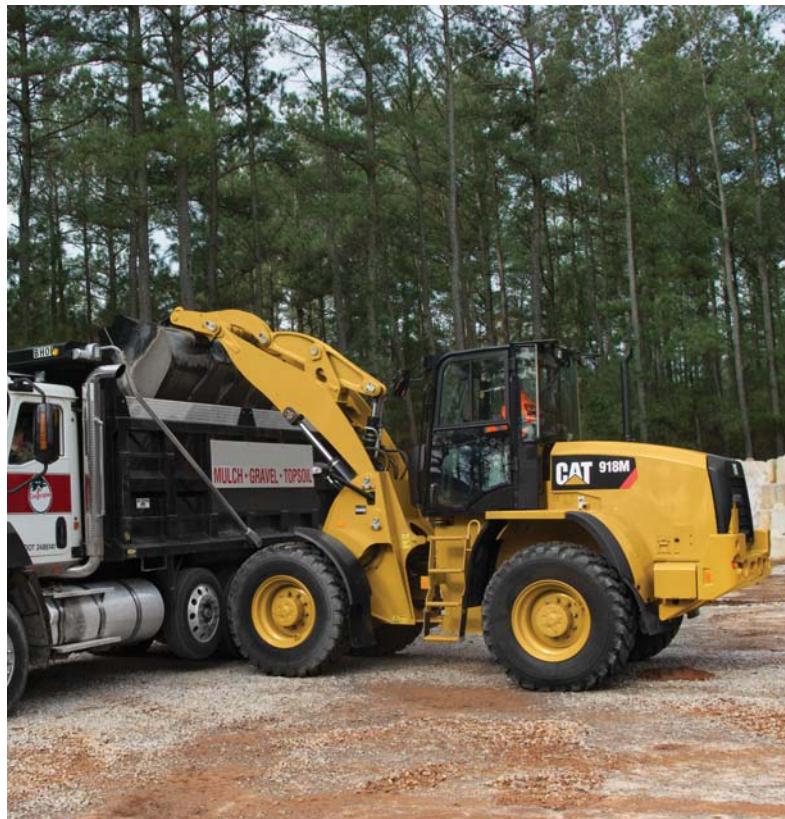

Lock up and go with fully locking front and rear differential axles that can be engaged on the move at full torque with the pull of a trigger on the multifunction joystick to keep you climbing.

Independent service brakes on front and rear axles provide robust stopping performance while a mechanical park brake allows you to safely secure the machine with ease.

Work Made Easy

Getting the job done.

Optimized Z-bar Linkage

The Caterpillar patented optimized Z-bar linkage combines the digging efficiency of a traditional Z-bar with integrated toolcarrier capabilities for great performance and versatility.

- **Parallelism** functionality built into linkage geometry gives truly predictable performance while high tilt forces throughout the working range help you safely and confidently handle loads with precise control.
- **Visibility** to bucket corners and fork tips at ground level remain excellent while sight lines at full lift are maximized.
- **Lift higher and reach further** with optional High Lift linkage available on the 910M and 914M.

Quick Loading Performance Series Buckets

Performance Series Buckets deliver up to 10% higher fill factors and better material retention for significant productivity and fuel efficiency improvements. The buckets feature a longer floor to take a bigger bite of the pile, an open throat to heap higher and curved side bars to help with material retention.

Smooth and Predictable Multi-Function Performance

M Series machines feature an electro-hydraulic control system that is governed by the Intelligent Power Management system for peak efficiency. The load-sensing, variable flow system senses work demand and adjusts flow and pressure to match the operators request.

- **Multi-Function without compromise** through dedicated hydraulic systems featuring one pump for the Intelligent Hydrostatic drive, a second pump for the implements, and a third pump for the steering system. Drive, Lift and Steer simultaneously with smooth predictable control. The M Series simply does what you ask it to.
- **Programmable in-cab kick-outs** on the 918M are easy to set on the go for tilt and lift. This feature is ideal for applications where the work cycle is repeatable allowing you to quickly return to programmed set points.
- **Effortless hydro-mechanical work tool operation** with creep control, throttle lock, and continuous flow. This allows the operator to lock in ground speed, engine speed, and auxiliary flow and focus only on steering the machine.
